

Custom Made Large – Heavy Duty Cargo Rack – 20 feet Long – 6 Feet Wide

## Custom Made Large – Heavy Duty Cargo Rack – 20 feet Long – 6 Feet Wide

This extra-large and heavy-duty roof-top cargo rack came into being as part of an art car idea that I wanted to make real and take to the world-famous Burning Man event in the Black Rock Desert area of West Central Nevada in 1999.

Well ... one thing led to another ... and ... the contraption I called “The Great Pyramobelisk of Ruth” finally emerged. Ruth was my girlfriend at the time, so I named it in honor of her. At first, she wasn't sure she wanted her name associated with the rig ... but ... when she saw how much fun everyone (including her) were having riding around on it, she became a believer.

The Pyramobelisk principal parts, starting with the main platform roof rack, are now up for sale.

Key features of this fantastic cargo rack are:

Extra large; Extra Strong; Extra Light for its size; Side shelves for ladders and other “tie-on” gear; Inert gas heli-arc welded non-rusting 6061-T6 alloy aircraft aluminum frame; Five sport-utility style cross-roof support frames ... and ... a half inch thick walk-on plywood deck.

As far as I know, these features are not available, at any price, from any commercial source. Folks, this fantastic roof rack is one-of-a-kind!
